📍 Kuala Lumpur, Malaysia

SUMMARY

Hello! I am a full stack developer working on web applications and web infrastructure. I have been developing professionally for 5 years but tinkering since a kid. I started in tech with internships, freelance services and part time positions during college.

I have a bit off delivers job history. I have had positions in help desk, web app development and sysadmin/devops.

I can help everywhere in the stack and I love wearing multiple hats to an extent.

Although, I do think my most strongest skills are in software engineering and server administration and front end/backend development.

A day in my life may consist of: prepping web design, fixing some front-end bugs, adding API endpoint, dockerizing an application, adding 3rd party apis, database design and more.

I am now seeking a stimulating opportunity closer to home.

EXPERIENCE

Frontend Developer

bossfoto

📅 07/2020 - 06/2021 📍 Remote

As a frontend developer I made the bossfoto.com site from scratch alone.

- Developed membership, event, and legal platform technology solutions, and automated internal processes.
- Generated \$50k+ in annual ad revenue as a system administrator of a large network of websites.
- Developed a node.js server to validate membership and track digital badges being used, saving the company \$22.5k.
- Using my strong experience make the almost components for the project.
- Keep the high quality code and coding style.
- Implement 3rd party apis inculde payment and Google Map etc.
